

PRODUCT SPECIFICATION

HORIZONTAL CABLE MANAGER

INTRODUCTION

The purpose of horizontal cable manager is to protect and manage copper or fiber cables under the professional environment. With the snap-on hinged cover design, it is easy to install and use.

Horizontal cable manager also allows flexible cable management including easy access to cables for moves, adds and changes in order to achieve a decent patching environment for the whole structural cabling system.

The cable manager is available in 1U or 2U height with choice of plastic or metal material.

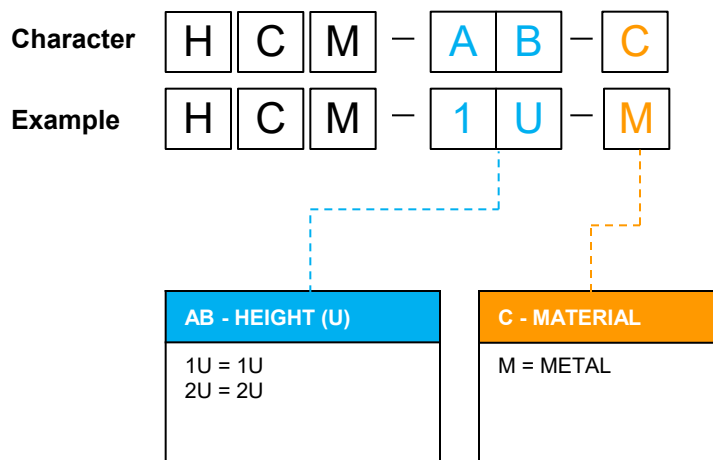

FEATURES

- Available in 1U or 2U height
- All mount to standard 19" cabinet and racks
- Available in plastic or metal
- Snap-on hinged cover
